

## TO GET MORE WATER

It Has Increased 2,000,000 Gallons Daily

## DURING THE PAST YEAR

Common Council Will Be Asked to Provide Money for a Large Hill Service Pump.

Greater pumping facilities are needed for the city water works, and yesterday the greater part of the session of the board of public works was spent in discussing the matter. An additional pump, or a larger pump with a capacity of at least 10,000,000 gallons daily, for the hill service is desired. The board has come to the conclusion that a pump large enough to supply the hill service for the next ten or twenty years is what is needed, instead of purchasing a new pump every two or three years, and then have one-half of the people out of water in hot weather. The engineer's report shows the daily average of water consumed last week to have been 9,977,353 gallons, while for the week ending December 24, 1922, it was 7,215,234 gallons. The increase is 2,762,119 gallons. The increased consumption is due to the fact that water mains have been extended very much during the past summer. If the increased consumption continues in proportion next summer, the present pumps will be unable to do the work, and that part of the city supplied by what is known as the hill service mains will be without adequate fire protection and without water for sprinkling and domestic use.

There is not enough money in the fund to purchase a pump, and if one is purchased it will be necessary for the common council to take measures to raise the cost for the purchase of it. It is a pump to be purchased, the board is of the opinion that it should be ordered at once, in order that it may be in place in time next summer to help out during the dry season. It is the opinion of the members of the board that some action should be taken by the common council, and to that end a communication will be formulated and addressed to the council in the near future.

The board will next week take a contract for the grading of South Lane avenue.

WILL HAVE MORE ROOM.

Charity Organization Society Unable to Deliver Wood Fast Enough.

Work has been begun on the annex to the work room at the Charity Organization society headquarters. The new building society has given the use of the basement of its church for a storeroom, and contributions which have been stored in a room in the Charity society's building are being moved into the new storeroom. This will give more room and a systematic arrangement for the various food cases.

Last night there were also orders in for wood at headquarters and only one man to deliver it. Search was made yesterday to hire a drayman to take the delivery, but no one could be found. The result was that the men who deliver regularly were told to work today. He will begin at 5 o'clock this morning and work until all the wood is delivered. The friendly visitors should be careful in reporting cases to give the street and number, otherwise it is difficult to find persons whom they report. Anonymous letters and reports will receive no attention by the secretary. If persons will not sign their names to communications the investigators can do nothing.

## FOUND A DEAD BODY.

Street Thompson Found Dead Near Otis Station.

The body of Ernest Thompson, a boy of 17 years, was found with a gun shot wound in the breast at Otis station in Newwaygo county yesterday morning. Near the body in an old dug out, was found the boy's cap, overcoat and a shot gun, one barrel of which had been discharged. The body was found by Detective Jake Johnson of this city and a companion. At first it appeared as if a murder had been committed, but on carefully examining the ground it appeared that after being shot he attempted to leave the place and go home. He appeared to have gained his feet and fallen again several times, as the ground was trampled down for quite a distance. He had succeeded in getting several rods from the place where the shooting occurred. Otis station is a small way station with no agent in attendance. The body was found about ten rods from the station building. The coroner at Newwaygo was notified and summoned a jury to investigate the case. The clothing was marked with blood and the body was cold and rigid, showing that he had been dead all night.

## GOING KYWARD RAPIDLY.

The St. Cecilia Society's New Club House-Progress Made in Its Construction.

When completed the club house of the St. Cecilia society will be a credit, not only to the city, but to the society as well. The edifice will be classed in the list of our handsomest structures and its fame will not be confined within the boundaries of the state. The first-aid will not at this time go into details as regards the features and interesting points of the club house, that will be left for a later date. At present reference will only be made briefly of the progress thus far made on the building.

A representative of THE HERALD recently, under the guidance of James Curtis, of the contracting firm of James Curtis & Company, who are doing the mason work on the building, toured over the now partly constructed edifice. About forty masons, etc., were engaged in their duties and the sight they presented, each man seemingly understanding what his particular duty was, was an interesting one to say the least. Mr. Curtis personally is superintending this contract and through his indefatigable efforts, progress is being rapidly made. The side walls are completed, carpenters are at work on the frames and work will be immediately commenced on the constructing of the front wall or facade. The stone and brick necessary are here and in readiness for use. Curtis & Company will push the work as rapidly as possible and are many days shall have passed the club house will be under roof. Too much cannot be said in praise of this firm for their efforts so far made in their work. Though rapid employers, they are careful and thorough in their system and the quickness of time already consumed in their work shows plainly that they are no loggards.

## Busy Beehive.

The Western Bee & Provision company's establishment was a busy beehive yesterday, and hundreds, yes thousands, of patrons went away happy with the quantity of meats or poultry received for the small sum of a money left. The Christmas was a success. It would not be amiss to state that during Christmas week the same low prices on everything will prevail that did during the great sale.

## Merry Christmas.

Julius A. J. Friedrich never uttered a more sincere expression than he did yesterday to a representative of THE HERALD when he said "Young man, you may say to the readers of THE HERALD that it is my earnest wish that all may enjoy a merry Christmas and a New Year filled with far more prosperity than the one now on the eve of closing. My holiday trade, the gentleman continued, 'has been all I could expect under the circumstances, but we will all now begin to stir up business for '24'."

Santa Claus will be at Leonard's all this week. Every child will receive a present.

## Did Splendid Business.

It is pleasing to state that the J. C. Herkner Jewelry Company is a firm that can be classed in the list of those that enjoyed a brisk holiday trade. The really magnificent display of rich and elegant novelties, all of which were new purchases, and remarkably low prices asked for the goods, were the causes of a good business being done by the firm. There were occasions during yesterday that the number of patrons were far larger than what could be conveniently waited upon by the clerks. More than one heart will be made glad Christmas morn by a gift that was selected from the stock shown by the J. C. Herkner Jewelry Company.
